

AI is Changing the Cyber Risk Game. Are You Keeping Up?

As AI rapidly expands the cyber attack surface, many security leaders are falling behind

Navigate a shifting cyber landscape

Balancing AI's potential with its inherent risks is no longer optional, it's essential.

73%

of organizations experienced a security incident

91%

link attack surface management to business risk

219%

increase in mentions of malicious AI tools

Understand cyber risk exposure

Today's attack surface is larger and more complex due to:

Remote work infrastructure

Expanding cloud environments

Proliferation of IoT devices

Shadow IT

Opaque data storage

Vulnerable components

Manage risk before it manages you

Fewer than

50%

monitor third-party vendors

Only

40%

use dedicated attack surface tools

Just

25%

of security budgets allocated to managing risk

Harness AI for good
