

For the third consecutive month this year the number of reported attacks was down in comparison to 2020. Notable incidents include an attack on the Newfoundland and Labrador Healthcare System which has been called the worst cyberattack in Canadian history, and German electronics retail giant MediaMarkt who got hit with a whopping \$240 million ransom demand from the Hive criminal gang!

Methodology

- This report was generated in part from data collected by [BlackFog Enterprise](#) over the specified report period. It highlights significant events that prevented or reduced the risk of ransomware or a data breach and provides insights into global trends for benchmarking purposes. This report contains anonymized information about data movement across hundreds of organizations and should be used to assess risk associated with cybercrime.
- Industry classifications are based upon the [ICB classification](#) for Supersector used by the New York Stock Exchange (NYSE).
- All recorded events are based upon data exfiltration from the device endpoint across all major platforms.
